

to Cleveland. He has dedicated himself to our church, and to the betterment of all mankind. His distinguished record of service speaks volumes, and I look forward to working with him to strengthen our community.

Mr. Speaker and Colleagues, please join me in honoring Auxiliary Bishop Lennon and welcoming him to Cleveland as our community's 10th Bishop. Today is a great day for the Catholic Church and the Cleveland community. Auxiliary Bishop Lennon brings a wealth of experience and knowledge, and I ask my Colleagues to join me in sharing in this tremendous day.

TRIBUTE IN HONOR OF JENNY  
CHANG

**HON. CAROLYN B. MALONEY**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 18, 2006*

Mrs. MALONEY. Mr. Speaker, I rise to honor a former staffer, a friend and an inspiration, Jenny Chang.

When Jenny came to work in my office in 2003, she had already been through one round with a formidable opponent, breast cancer. But you certainly couldn't tell. She brought an energy and positivity rarely seen, and none of us will ever forget her laugh.

I admire leaders, and Jenny Chang was a leader. Jenny was student body president and president of her senior class at North Carolina State University—she was the first woman of Asian descent to hold that position. Through her battle with a terrible disease, Jenny reached out to fellow cancer sufferers and survivors and used her position on Capitol Hill to make a difference. Despite her illness, she worked on my colleague DAVID PRICE's campaign and in his Congressional office, making scores of new friends and admirers at each stop.

And for 8 months, she was the soul of my office, always showing how things can be done and how problems can be solved.

It saddened us all when Jenny's cancer returned and she had to take leave of my office and Capitol Hill.

Mr. Speaker, Jenny Chang passed away on April 29. We should all be so lucky to work with such a terrific soul as Jenny Chang. She did many great things in her short time with us. And what she left us—the memory of her smile, her spirit and her strength—is so much more than any of us could ever give her.

Sometime God takes the best of us far sooner than we want. I thank God for giving us our time with Jenny and I wish her family and friends my deepest condolences.

RECOGNIZING SHARON KOSEK

**HON. SAM GRAVES**

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 18, 2006*

Mr. GRAVES. Mr. Speaker, I proudly pause to recognize Sharon Kosek of St. Joseph, Missouri. After long tenure in the St. Joseph, Missouri School District, Sharon will be retiring. Sharon has taught in the St. Joseph School District for the past 23 years and has recently

been named the Association for Career and Technical Education Outstanding Teacher in Community Service. She has been a model of strong service and civic leadership.

Sharon has served as the Business Coordinator and Administrative Office Systems instructor at the Hillyard Technical Center, as well as the advisor for the Phi Beta Lambda adult business student organization. Outside of the classroom, Sharon has remained active in the ACTE, Missouri ACTE, National Business Education Association, and as the Legislative Chairperson for the St. Joseph Parent Teacher Association.

Mr. Speaker, I proudly ask you to join me in recognizing Sharon Kosek. Her commitments to excellence in education and community service have remained as an inspiration to all of those people around her. She will certainly be missed and I would like to ask the House of Representatives to join me in thanking her for all of her hard work and dedication over the years. I am honored to represent her in the United States Congress.

RECOGNIZING KENT STATE UNIVERSITY PRESIDENT CAROL A. CARTWRIGHT FOR 15 YEARS OF SERVICE TO OHIO EDUCATION

**HON. RALPH REGULA**

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 18, 2006*

Mr. REGULA. Mr. Speaker, I rise today to recognize Carol A. Cartwright, President of Kent State University, for 15 remarkable years of academic, community and national leadership. It has been my genuine pleasure to work with her on a range of priorities in northeast Ohio, including education and learning, economic development, healthcare and research.

Kent State has eight campuses, including the Stark campus in my District, with more than 34,000 students seeking from 2-year to Ph.D. degrees. Its leader must be a great communicator, able to multi-task and an innovative thinker in her approach to getting the job done. Carol Cartwright does that every day with a smile and a quick wit, as well as considerable knowledge and experience.

Throughout her career, Dr. Cartwright has been a role model for women in higher education and every walk of life. After working as a teacher, university professor, pioneering researcher in the field of special education and as a university executive officer, she made history in 1991 when she became Kent State University's first woman president and the first woman president of a public university in Ohio. From the outset of her presidency, she has been an active advocate of professional-development and personal-growth initiatives for women. In her first year of eligibility, she was elected to the Ohio Women's Hall of Fame.

She was also a member of the committee that worked with my wife, Mary, to bring the long-overdue idea of a National First Ladies Library to life, and Carol continues to serve on the Library's national board. She also serves on the American Council on Education Commission on Women in Higher Education and the board of directors of National Public Radio.

Carol has a clear commitment to all students, and she has been instrumental in build-

ing one of the finest programs in the nation to help GED candidates advance to pursue college degrees. I look forward every year to attending the graduation ceremony to hear wonderful success stories and to learn of students' academic achievements—thanks to the GED Scholars Initiative at Kent State.

On October 5, 2005, Dr. Cartwright, Kent State University's 10th president, announced her decision to step down from the leadership position she has held since 1991. She will retire from the presidency upon the arrival of her successor. I want to congratulate her on a tremendous job and wish Carol and her husband, Phil, health and happiness in the future.

VALLEY FEVER VACCINE  
DEVELOPMENT ACT

**HON. WILLIAM M. THOMAS**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 18, 2006*

Mr. THOMAS. Mr. Speaker, I rise today to discuss the Valley Fever Vaccine Development Act, which I introduced today.

Valley Fever or coccidioidomycosis is a serious human disease caused by the inhalation of a soil-borne fungus, *Coccidioides*, and particularly impacts public health in the southwestern United States, specifically California, Arizona, Nevada, New Mexico, Utah, and Texas. According to researchers involved in the Valley Fever Vaccine Project, each year an estimated 130,000 people nationwide are exposed to Valley Fever and there are about 5,000 cases. Of those cases, between 2,500 and 5,000 are serious and about 500 people die from Valley Fever. The disease is especially prevalent in Kern County, California, which I represent; 1,540 cases were reported in 2004, which was an increase of 1,137 from the 403 cases reported in 2000. Similar increases have been reported in Arizona, where some anticipate the number of cases this year will exceed 4,000. Moreover, 46 Kern County residents died from Valley Fever from 2000 to 2004.

Valley Fever particularly affects those with impaired or less developed immune systems, including children and the elderly. The disease has a high incidence among minority populations as well as among those who work outside in occupations such as construction, agriculture, mining, energy, and the military. In addition, the disease also impacts those who engage in outdoor recreational activities, such as biking, golf, hiking, jogging, motorcycling, rock collecting, and tennis.

The drugs currently used to treat Valley Fever are often ineffective and the average hospitalization charges for the seriously ill exceed \$30,000. Accordingly, a preventative vaccine is desperately needed. Unfortunately, there currently is no vaccine for Valley Fever and there is no private industry interest in making the investment, estimated to be about \$40 million, needed for the development of the vaccine.

However, nonprofit organizations have sponsored exploratory research conducted by the Valley Fever Vaccine Project and their efforts have resulted in the identification of candidate vaccines for pharmaceutical development. While I greatly appreciate the \$930,000 that has been provided through the federal appropriations process since Fiscal Year 2003
